
General Manager – Foundry Project

One of the world's leading foundries for Railway products of USA, requires the services of a cast steel foundry expert to plan and oversee the Project of setting up of a large, state-of-the-art steel foundry of around 30000 tonnes capacity, in a joint venture in India.

This is a senior position, at the Corporate office in Delhi, with the job involving planning and execution of the Project and will include identification and selection of suitable machinery and plant, raw material sources and supply chain, plant layouts, overseeing and monitoring project construction, optimisation of capital/operational costs by suitable adoption of process and manufacturing technology to suit Indian conditions, energy conservation and pollution control procedures, etc.

We are looking for an experienced and energetic person with at least a Bachelor's Degree in Engineering with a minimum of 15 year's experience, out of which at least 10 years should be in operation of a steel foundry dealing with large castings. Experience with no-bake sand processes and mechanised foundries will be preferred.

Interested persons may apply with expected remuneration to:
